Scottish Care is a body representing all the interests of its members through close working partnerships with relevant bodies: the Scottish Government, the Care Commission, Scottish Social Services Council COSLA and others. We have been working in close partnership on a range of "emerging proposals" to help plan and deliver improved care for people in the face of the challenges posed by demographics and the current financial climate.

This conference is an opportunity to address these challenges and proposals. Scottish Care supports the requirement for innovations in services to improve the lives of all those individuals who require care in society, with a review on the resources and cost base for care, ensuring that it is deliverable within a Best Value, equitable, sustainable, quality focused and fair framework.

Scottish Care desires to promote debate and transparency on the quality and future resource base for the provision of care services with all key stakeholders

Who Should Attend: The conference is designed for those working at a senior level, commissioning, developing and planning services, those providing care and support to families, children, older people and adults across the wide continuum of social care and health services in Scotland.

- Independent Providers, Professional Bodies
- Senior Management Social Work
- Local Authorities
- NHS
- Community Services and Housing
- Government and regulatory bodies
- Commissioning & Procurement specialists,
- Service users & Carer representatives and others
